

This comment is regarding our station K-love which is heard in our area at 88.7, 92.9 FM, these two stations are being heard on what is known as FM Translators and we would like to see these stations continue. Low Power FM and the FCC is proposing to expand their service which would then allow them to take priority over the Translator services. Please do not allow this to happen. K-Love is a very important station to many families with small children and young adults. It gives both the parents and these children great music to listen to and parents peace of mind knowing that the content and materials will be both child and family friendly. The other options here in our local area are fairly slim, most are out for the shock value, there should be warning announcements for some of them, or they are geared to those who enjoyed the music from the 60's and earlier. While I am not opposed to the 50's and 60's it is before my time and certainly that of my children so therefore not an option either.

Please allow K-Love to continue using the Translator service on stations 88.7 and 92.9 in the Portland/Metropolitan area so that we can continue to enjoy these wonderful stations.

It is very refreshing to have an option like this, this area really needs this type of broadcasting, not to mention that my family and many others have been listening to K-Love for many years and to lose it would be heartbreaking.

Thank you for your time and consideration in this matter we hope that you will think favorably on us as we plead for our stations.

Sincerely,

The Houston Family
